iNTELLIGENT INTEGRATED
COMMAND &
CONTROL CENTRE

iICCC

AI POWERED - LIVE DATA - OPTIMISED AND REMOTELY CONTROLLED OPERATIONS - ENHANCED SAVINGS
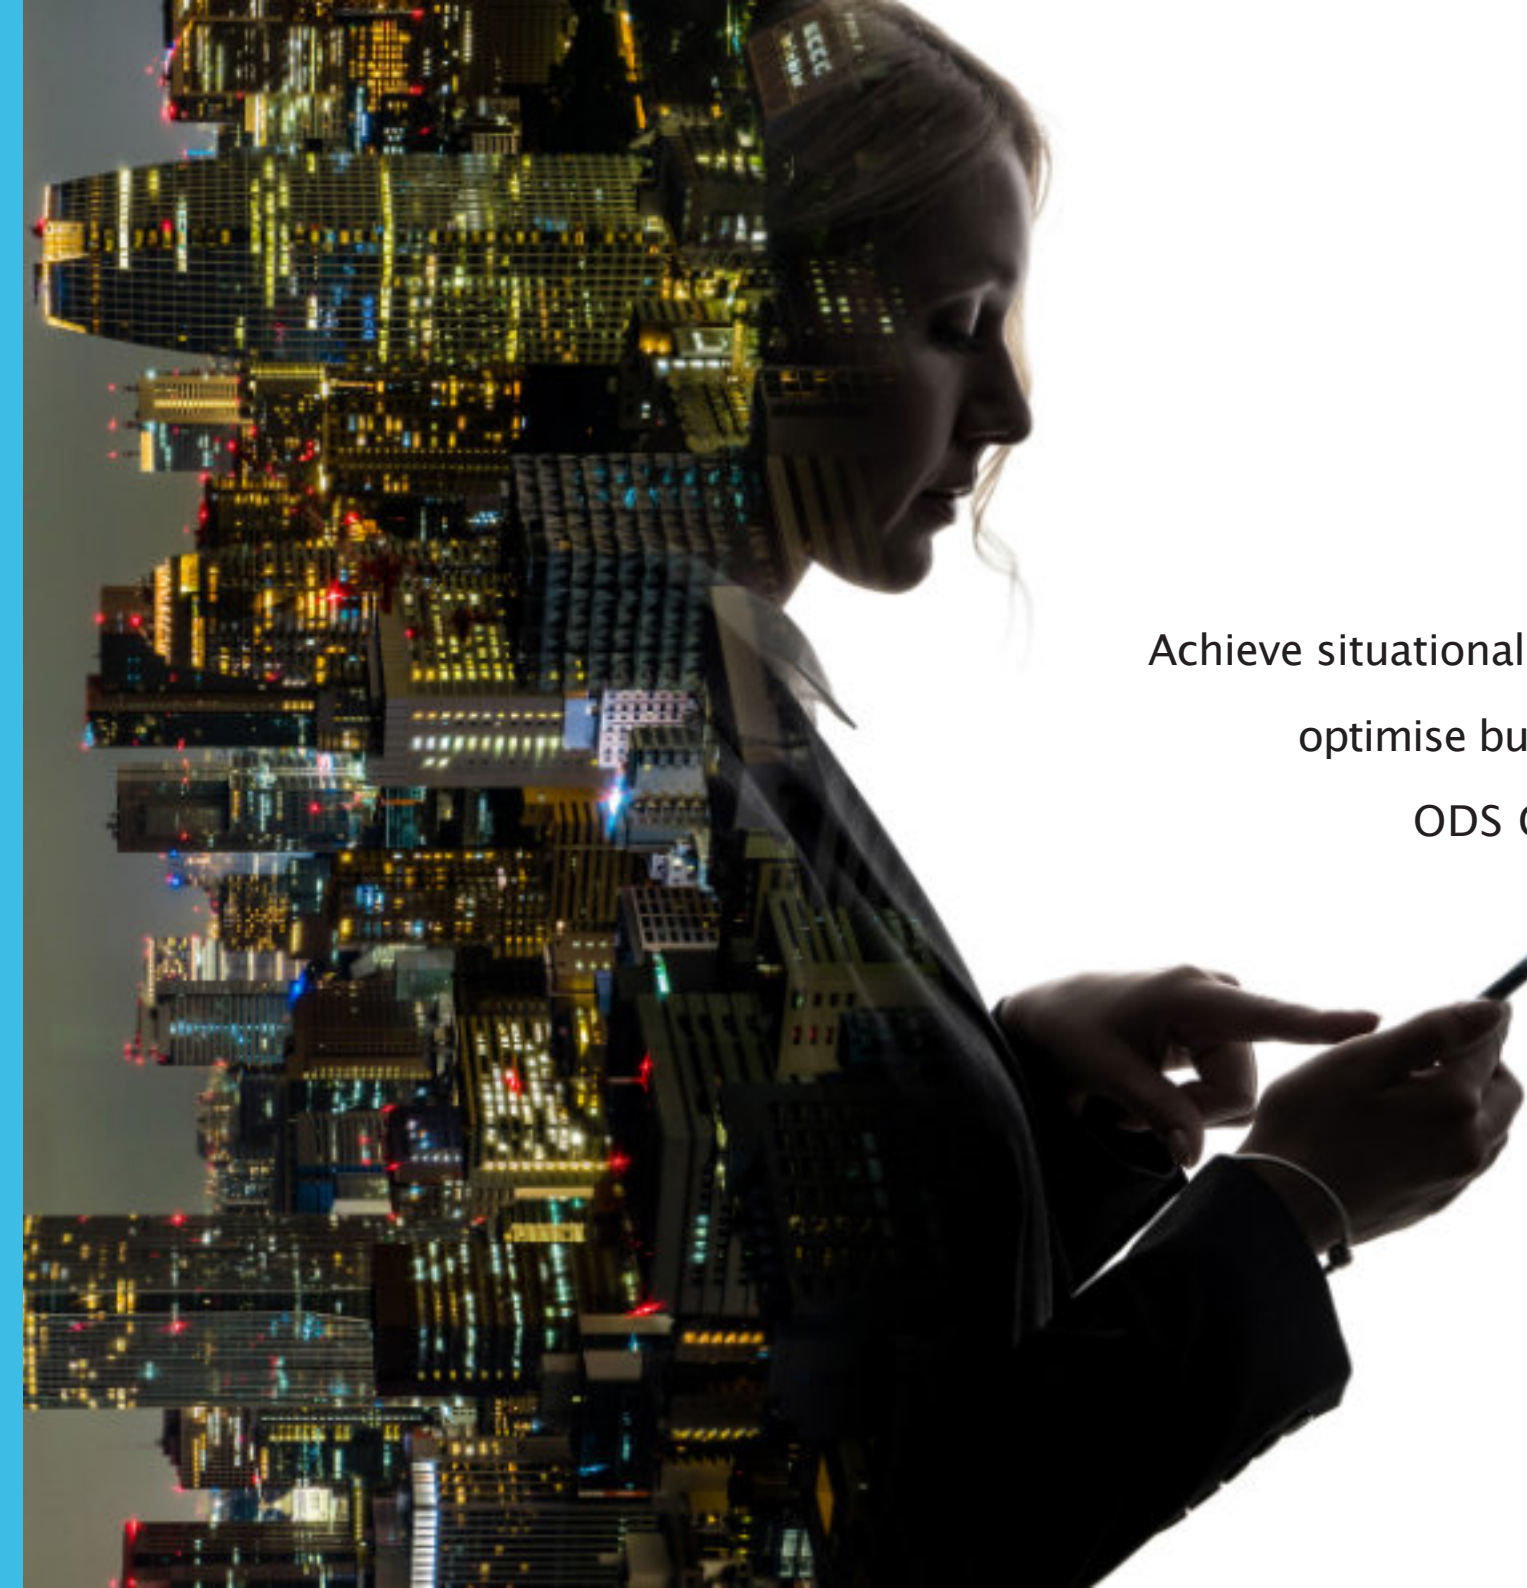

NETIX.AI

ODS Global's intelligent integrated command and control centre caters to various facets of commercial/residential vertical domains enabling clients to reap the benefits of optimising their fixed assets operations in real-time.

Our integrated command and control centre enables enterprise-level view of connected facilities in the real estate portfolio. It enhances the efficiency of assets and safety of the building/city and its occupants, utilising advanced analytics and artificial intelligence.

ODS Global's iICCC is capable of integrating data from existing operational sites and onboarding it to a customisable intelligent platform to act upon and achieve the best in terms of operational costs and efficiency.

iICCC identifies gaps in the optimisation of building automation services and energy management and addresses them in a technologically advanced, functional and good governance perspective, besides driving better ROIs for building owners and facility managers
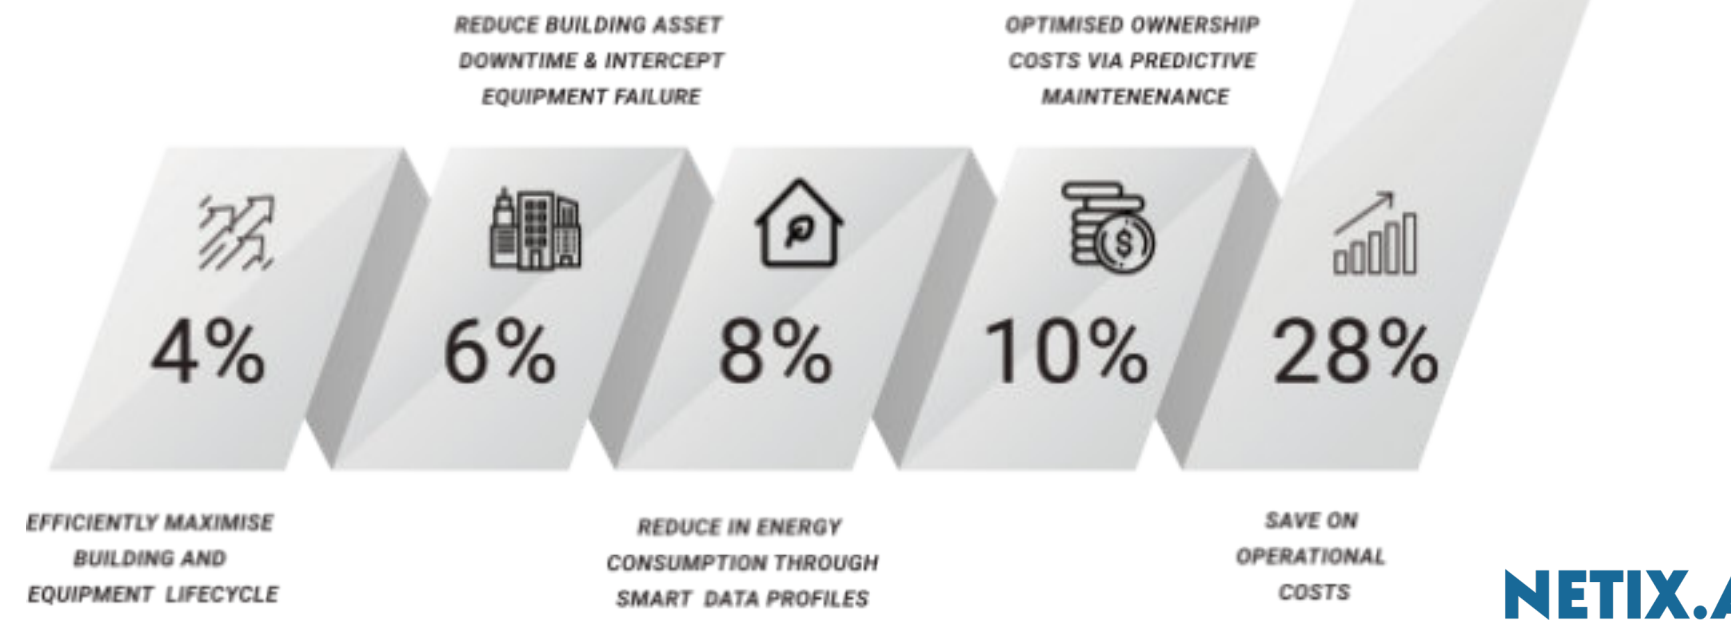

Achieve situational awareness, manage risks and
optimise building operations with
ODS Global's iICCC

**HAVE A FINGER ON THE
PULSE OF YOUR FACILITY**

OPTIMISE WITH iICCC

	REDUCE BUILDING ASSET DOWNTIME & INTERCEPT EQUIPMENT FAILURE		OPTIMISED OWNERSHIP COSTS VIA PREDICTIVE MAINTENENANCE	
4%	6%	8%	10%	28%
EFFICIENTLY MAXIMISE BUILDING AND EQUIPMENT LIFECYCLE		REDUCE IN ENERGY CONSUMPTION THROUGH SMART DATA PROFILES		SAVE ON OPERATIONAL COSTS

NETIX.AI

OUR SUITE OF APPLICATIONS

1
BUILDING PERFORMANCE MANAGEMENT

- Aggregating bulk data types to generate meaningful insights and optimize energy use
- District level KPI monitoring and reporting
- Statistical energy savings analysis considering weather and occupational patterns
- Enables data-driven automation and controls strategy

2
REMOTE ENTERPRISE BMS

- Configurable centralised platform for BMS
- Extensive integration capability, seamlessly connects any system irrespective of the type, make or protocol
- Interactive and real-time data representations

3
FAULT DIAGNOSTICS AND ANALYTICS

- Centralised systems can preempt anomalies to facilitate smooth facility management operations
- Remote access to insights from AI powered analytics
- Multilevel dashboard accessibility

4
FACILITY AND PROPERTY MANAGEMENT

- Streamline CAFM suite
- Integrate Work Order Management
- Executive dashboards
- Automate and configure operational process from tenant billing, parking management to much more

KeyFacts

Centralised monitoring improves lifecycle of fixed assets

Optimised operations

Emirates

KeyFacts

Optimised operations of 24 buildings

Improving life cycle of fixed assets

DAMAC

KeyFacts

Upgradation/Integration and maintenance of three buildings

Transperant visibility of parameters via anintuitive GUI

AVENUE

KeyFacts

Integration of multiple vendor equipment

Integration of 14 buildings on to a central server

CITY WALK

PORTFOLIO OF ODS GLOBAL'S SERVICES

- IoT & AI Powered Digital Services
- Life Safety and Security Services
- ELV & Spare Parts Services
- Maintenance Services
- Smart BMS and Connected Building Solutions
- Managed Services
- Retrofit & Modernization Services
